1. Connect the device and computer with Android data cable.
2. Driver Installation(If you have already installed it, you can ignore this step)
   1) Double-click to run the driver installation script(This script is placed in a zip named Morefun_driver)

   2) After the driver is successfully installed, the device manager on the computer will display a port with the name MoreFun CDC.

3. Enter #1201# on the device(MP63) to open log. After successful operation, the following page will appear.

4. Open the sscom32 tool. Select the corresponding port which the device connect with computer and open.

5. After the operation is successful, the terminal's log will be output to the tool.

```
key scancode 17, keycode:68, status 1
keyev1 = 68,1,202
key scancode 17, keycode:68, status 0
keyev1 = 68,0,202
_menu_Paint:28
key scancode 49, keycode:20, status 1
keyev1 = 20,1,202
key scancode 49, keycode:20, status 0
keyev1 = 20,0,202
```
